Projects

Recipe Finder

Node.js | CSS | SQL [Deployed Link](#)

This site allows a user to search a recipe based on ingredients i.e. Chicken, tomatoes, onions. Then they could save those recipes on a week based planner.

- Responsible for back-end functionality in terms of connections to all of the files, Login and Sign up features
- Utilize SQL to save and store user info so users can sign up and login to the website
- Stylized the page with CSS and used a third party API to make it easier.
- Coded with a team of 4 student developers in 2 weeks

Music Box

React | Node.js | [Deployed Link](#)

This site allows a user to search music and like songs to save to their profile.

- Responsible for the front end using react to create and link the pages
- Styled the pages to look professional and user friendly
- Coded with a team of 4 student developers in 2 weeks
